Warehouse Setup

Multi-warehouse is a separate sub-module of Huge ERP.

Multi-warehouse allows one to put stock in multiple warehouses.

Multi-warehouse allows one to transfer stock from one warehouse to another.

Take stock control and stock takes on each warehouse.

Allows one to GRV stock into a specific warehouse and sell from another warehouse

Multi-Warehouse is also used for consignment stock.

This sub-module resides in the main inventory module.

The screenshot displays the 'Warehouse Setup' interface. On the left, the 'Inventory Module' sidebar shows 'Configuration' with 'Warehouse Setup' highlighted. The main area is divided into two panels. The left panel, titled 'Warehouse Setup', contains fields for 'Code:', 'Description:', and 'Active:' (checked). Below these is a table of existing warehouses. The right panel, titled 'Warehouse Branches', contains fields for 'Code:', 'Description:', 'Active:' (checked), 'Location:', 'Sync Mobile:' (checked), and 'Incl In Below Min Rep:' (checked). The 'Code' field is populated with 'PTA', 'Description' with 'Pretoria Warehouse', and 'Location' with 'Waterval, Pretoria'.

Branches Link

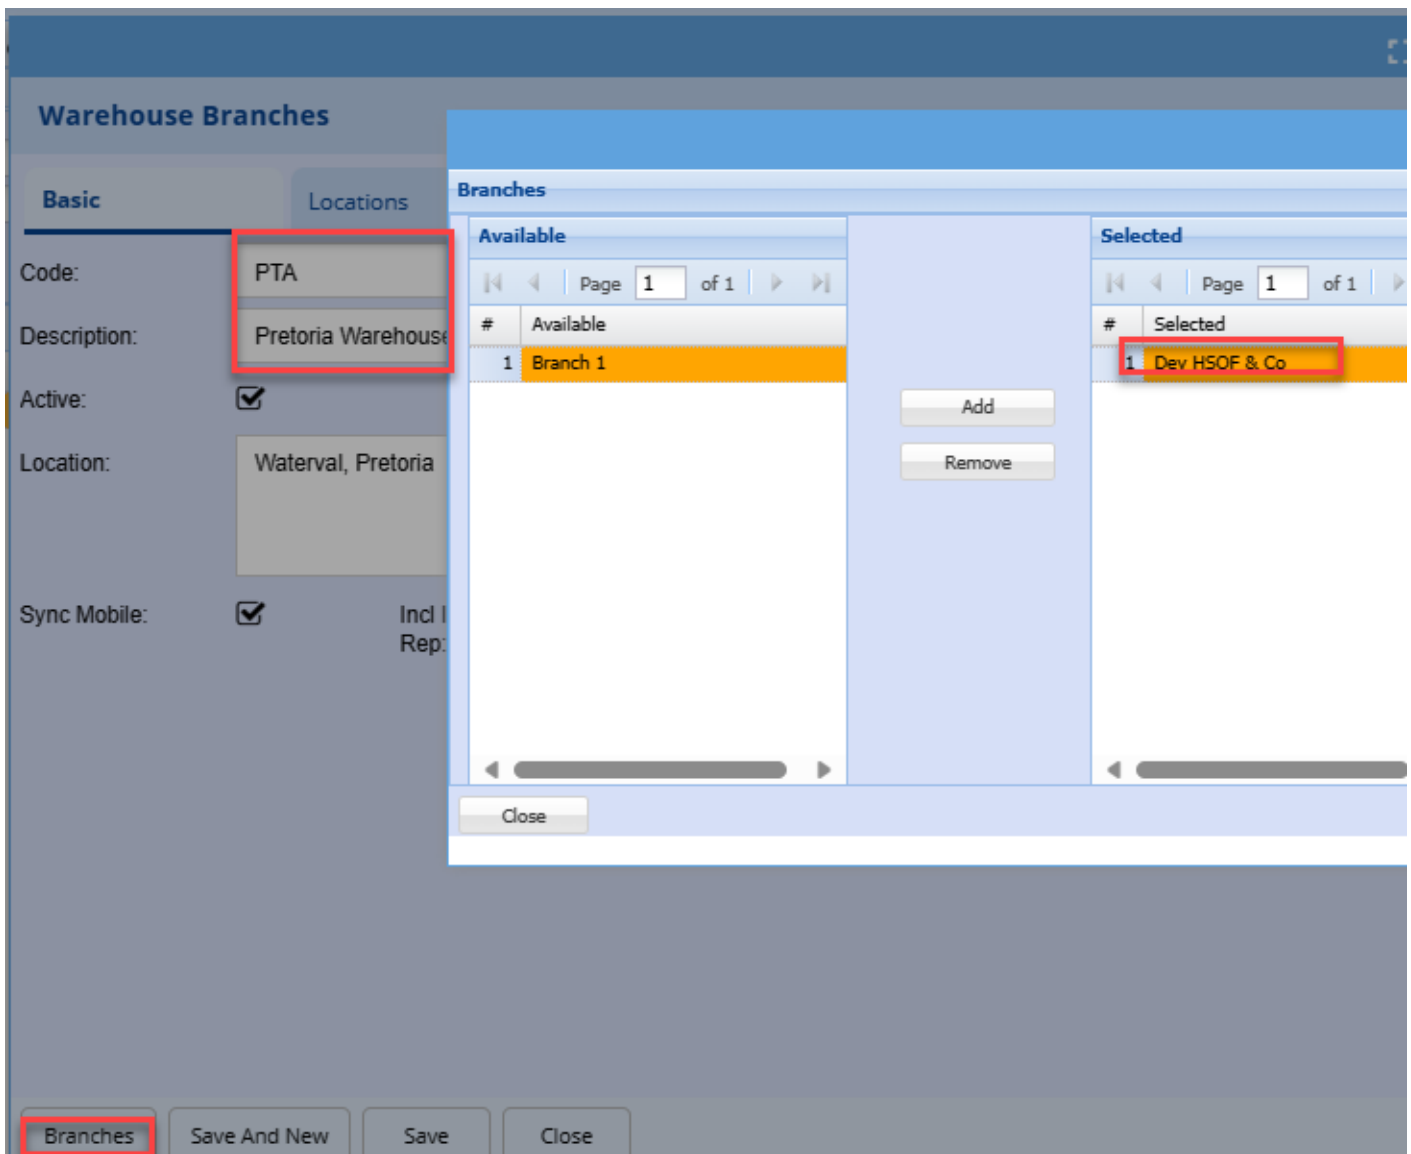

Warehouses are typically linked to Branches. Thus, this setup is only required if you have multiple branches setup on the system.

To link a branch to a warehouse

Click the Branch button.

Then select the respective Branch to be linked to this warehouse.

double click the required branch on the left to move to the selected grid on the right.

Warehouse item association:

Once the warehouse has been created, you will need to associate inventory items to the specific warehouse.

This feature allows one to have the flexibility to link specific items to specific warehouses.

for instance, if you have multiple branches, all branches may not necessarily stock the same items.

to associate items:

If all warehouses stock all items, then you can do a quick associate:

Click once on the selected or new warehouse and click the Associate button.

Locations

Locations are linked to a warehouse

Locations have a unique code across all warehouses. This adds value when you want to scan a location, it will give you the warehouse that it is linked to.

There is Always one location setup per warehouse which is the default (system Location)

A hotfix will be created and run to update all existing warehouses with at least one location for each.

This system location cannot be deleted or made inactive. One can change the code or description, but not remove as it is linked to the warehouse.

Multi location and bin location

This is a new feature that is coming up before the end of the year

This feature will be found under

Inventory Module > Configurations > Warehouse Set up > Locations Tab

The feature will include the following:

1. Multi-locations within a warehouse
2. Multi-bin locations within a warehouse
3. Boxing of products in a location

The screenshot displays the 'Warehouse Branches' application window. The 'Locations' tab is selected. A 'Location Create' dialog box is open, showing the following fields:

- Code:** RECWH - ML
- Description:** RECWH - ML
- Warehouse Linked:** Debtors Warehouse
- System WHS:** Yes
- Active:** ☒
- WHS:** RECWH
- Shelf:** (empty)
- Row:** (empty)
- Section:** (empty)
- Separator:** None

Buttons at the bottom of the dialog include 'Save And Close' and 'Close'. The background application window shows a table with columns for '#', 'Cod', and 'Shelf', and a 'Make Code' button.
