

Backup Download

Download backups from Webaccounting

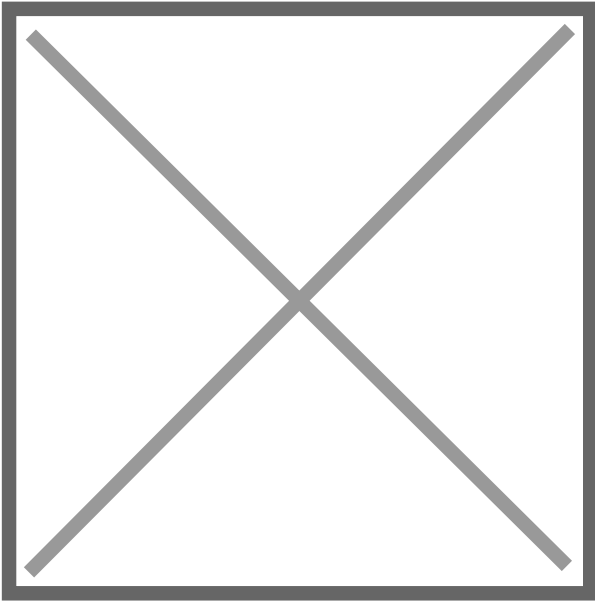

Before going to the backup download one has to enable a password to download backups.

To restore a backup one must first create a backup restore PASSWORD which can be created under
System Configuration > Administration > Company Profiles.

Click on the Extras dropdown AND click on the “Set Backup Restore Password” button.

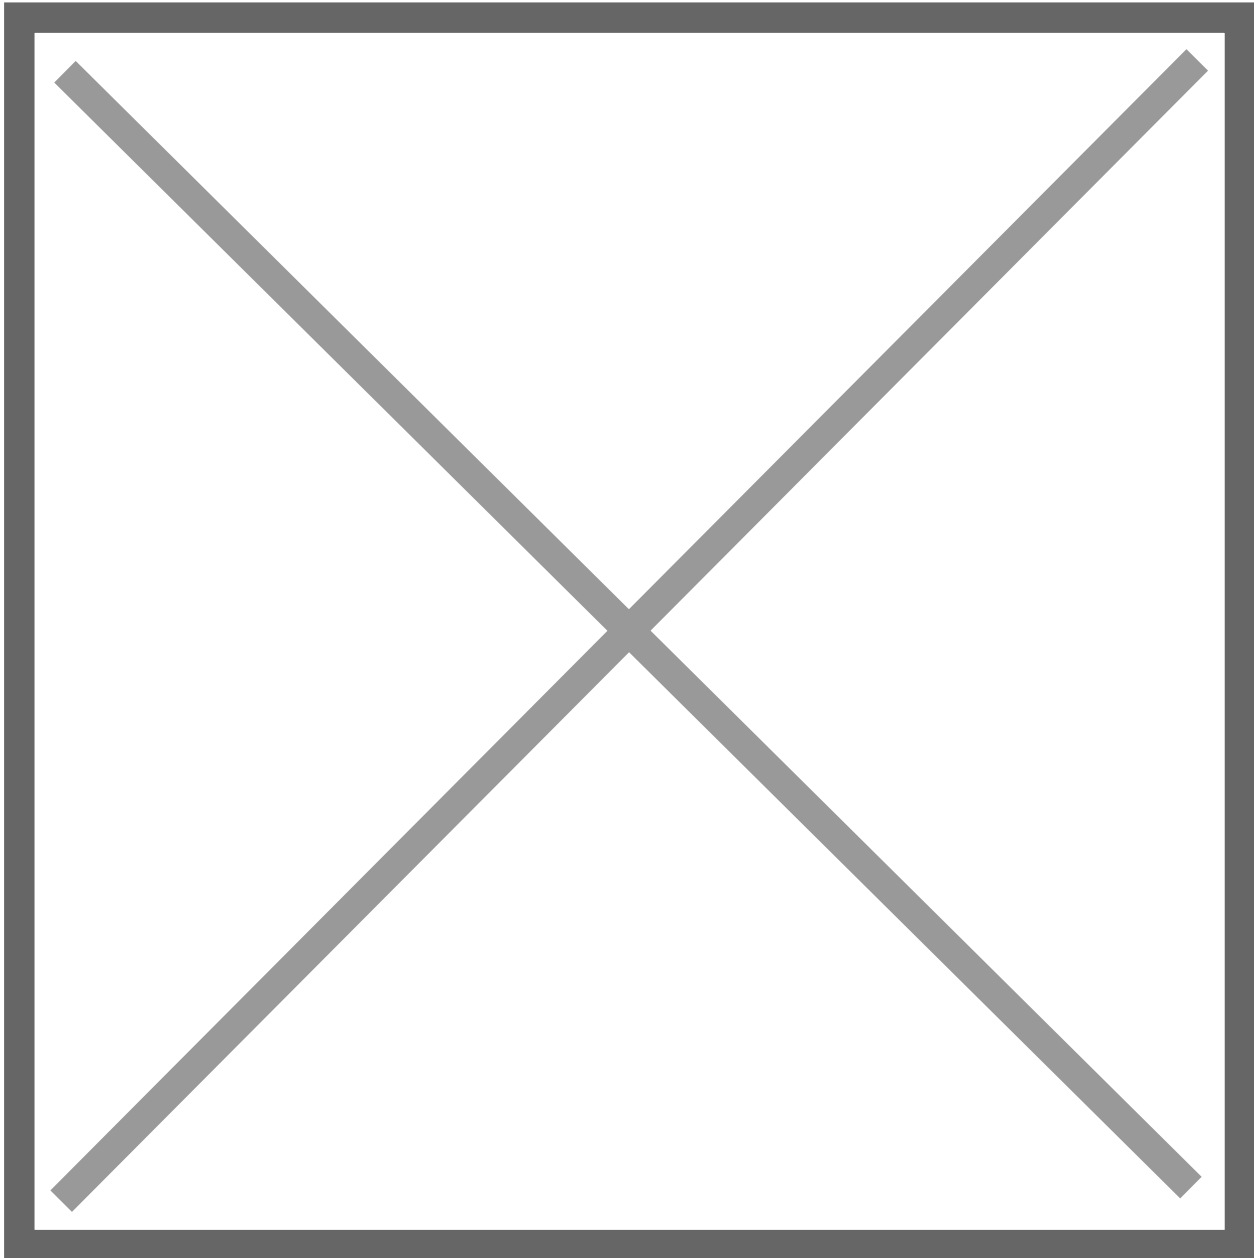

Enter a password and click on the Save button

Click on OK and then on the “Close” button

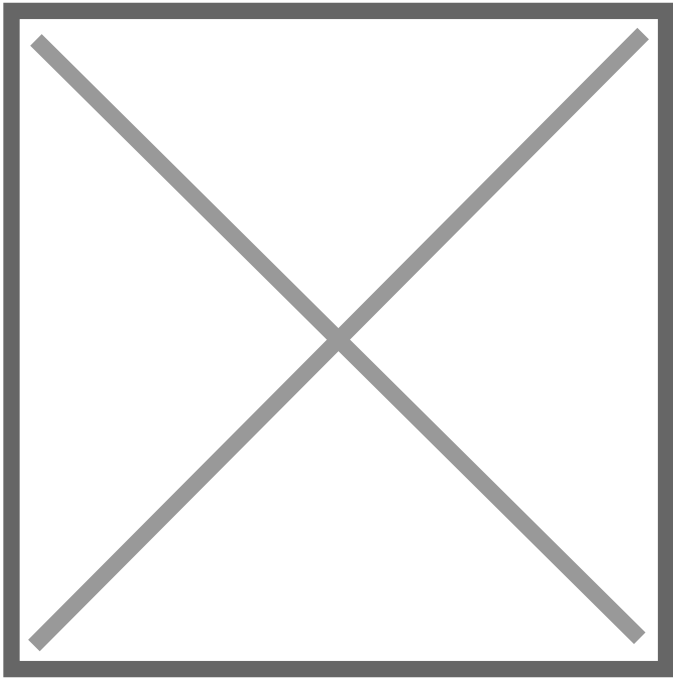

Go back to the Backups screen System Configuration ▢ Administration ▢ Backups.

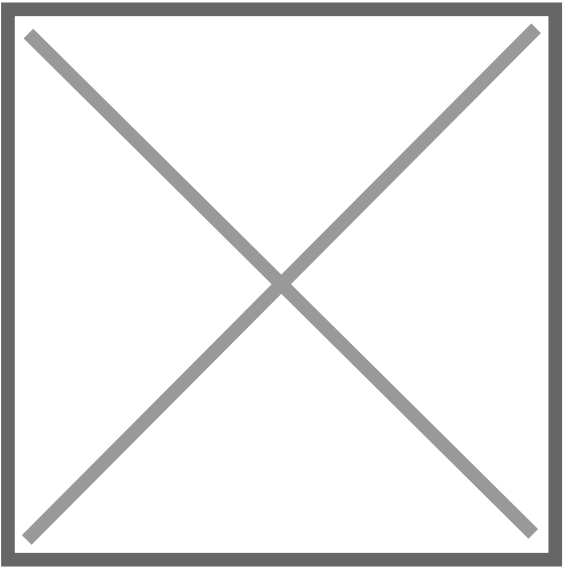

Search and find your backup that you want to download.

NOTE: You can only download the files that have a .7z file extension.

Click on the Restore tab at the bottom of the screen.

Enter your password

Click on Save to Save to your local drive
