

Barcode Printers supported

Huge ERP supports GoDex Barcode Printers

Dependent on the volume of labels to be printed, you will either have a desktop or industrial printer.

Here are some basic setups to be done to have the printer working

Steps to setting up printer

1. Unbox printer
2. Insert Ribbon
3. Insert Labels
4. Calibrate labels
5. Download Godex drivers and install
6. When asked, plug in USB so software can pick up printer and complete driver install
7. Install Go Label V2 software
8. Setup settings in printer
 1. Options for prompt for print
 2. Printer setup to correct printer
 3. Set Darkness and speed
 4. Resin ribbon (about 13 on Darkness)
 5. Wax Resin (about 8 on Darkness)
 6. Wax (about 4 to 5 on Darkness)

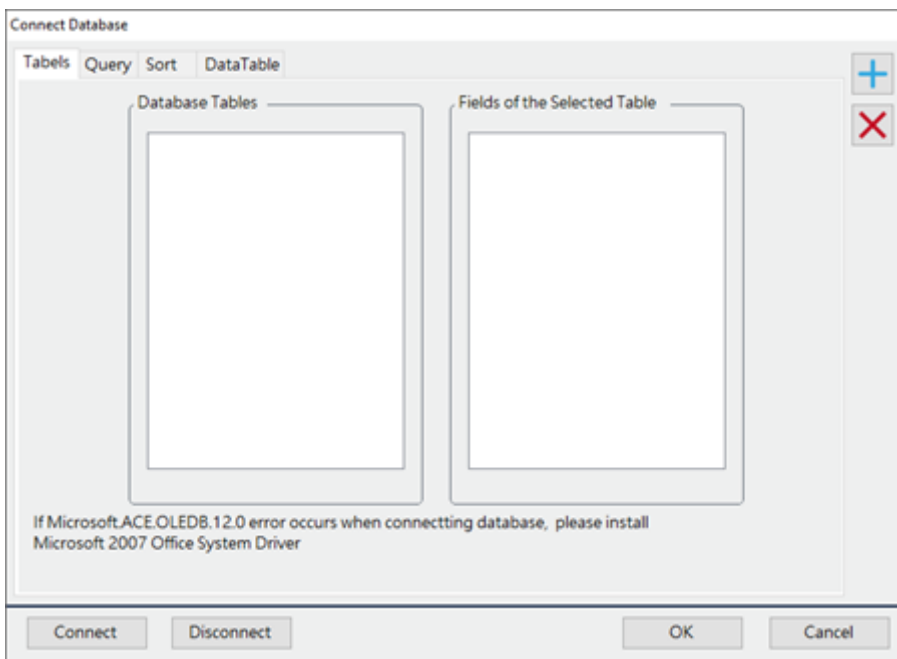

Example of Godex G500

Media Loading	https://youtu.be/hqFqbXMV_Yo	Video on how to load media into printer
Calibration	https://youtu.be/hKt1ihqlu38	Video on how to Calibrate printer
GoDex printer driver	https://www.seagullscientific.com/support/downloads/drivers/godex/download	Godex printer drivers
GoLabel V2	https://hugeerp.co.nz/csp/WebHelp/files/GoLabel_II_V2.1.msi	GoLabel design labels
Microsoft 2007 Office system driver	https://hugeerp.co.nz/csp/WebHelp/AccessDatabaseEngine.zip	Microsoft 2007 Office System Driver (Only when linking database to Excel with errors)

When linking an Excel database to the GoLabel and an error comes up, you will need to install the Microsoft 2007 Office system driver
