

Margin Percentage

Inventory Analysis - Margin Percentage

The margin expresses profit as a percentage over the stock items.

Margin percentage is a direct reflection on how well the business is performing

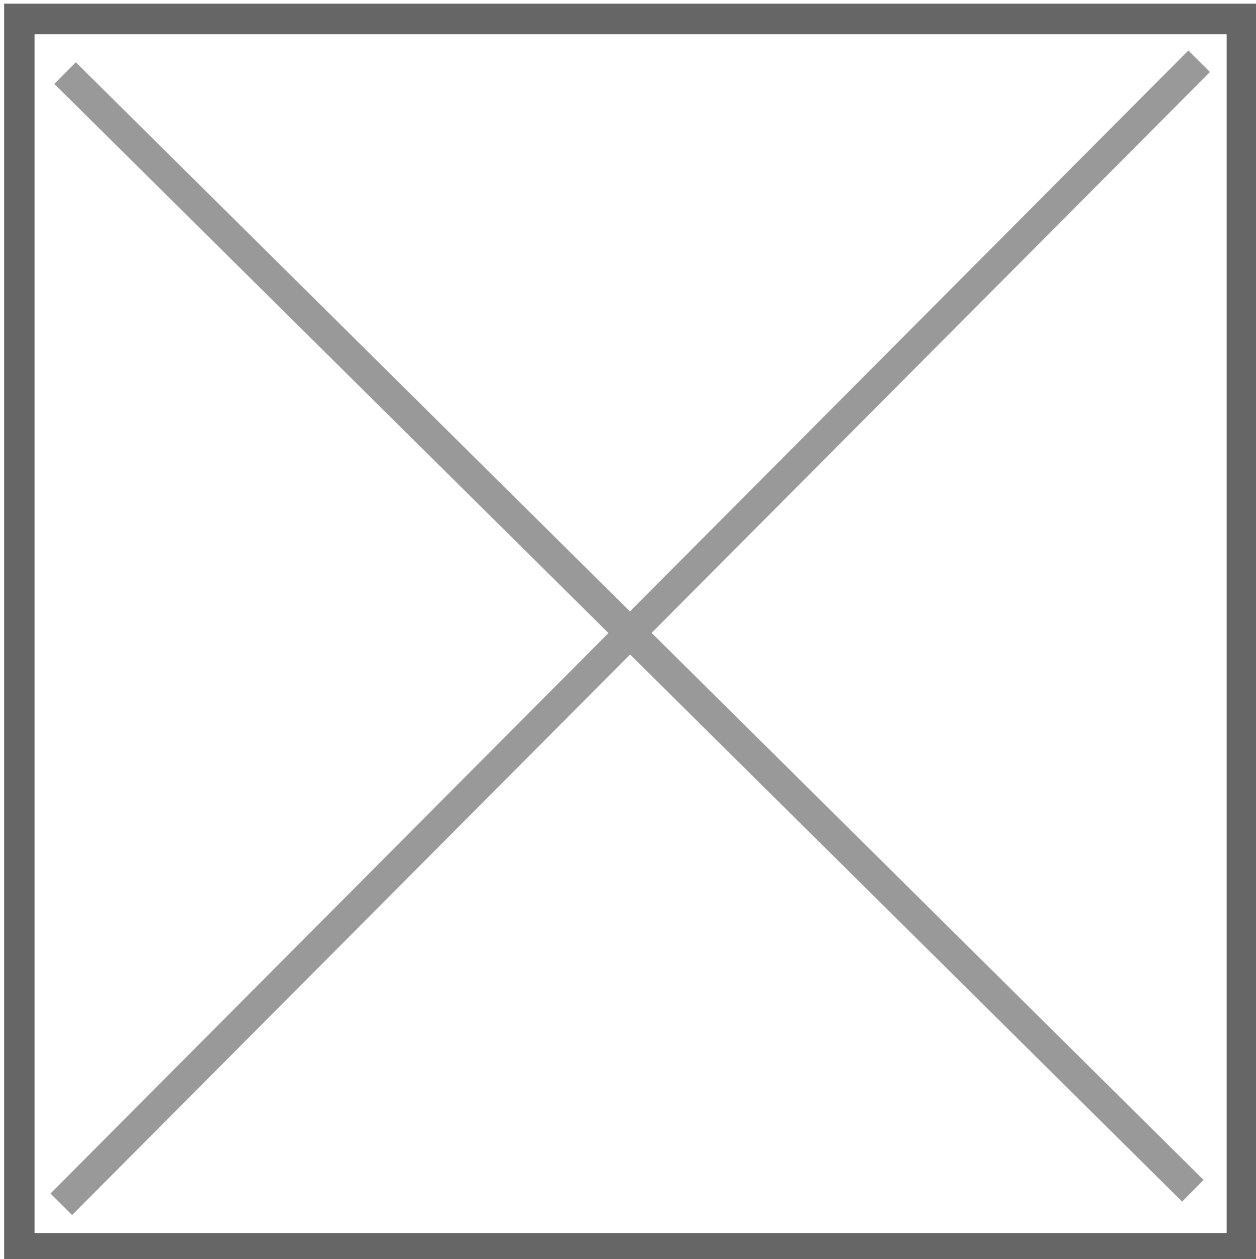

Search - the user must select the either the Supplier or Item Code when searching for margin percentage,

otherwise the system will take long to search all the items on the system if nothing has been selected.

Date From - search by selecting the date from and the date to, in order to avoid long search

GRV - search by entering GRV number

Order By - search by selecting from the drop down arrow the desired Criteria.
