

Warehouse Transaction

Inventory means things in the warehouse and inventory

Warehouse transaction history shows a

list of transactions transferred from one warehouse to another according to the date selected.

Webaccounting provides users with various search criteria's

Governed by the date range the system will search for every transaction entry within the displayed date.

when searching for a specific entry - take note of the transaction date it falls under to be able to see it on the grid.

Warehouse Sending - The user has an option to select the warehouse that is transferring stock

Warehouse Receiving - The user utilises the option to select which warehouse is receiving the stock

Transfer No - The user can search by given transfer number

Stock Item - search by selecting the stock item

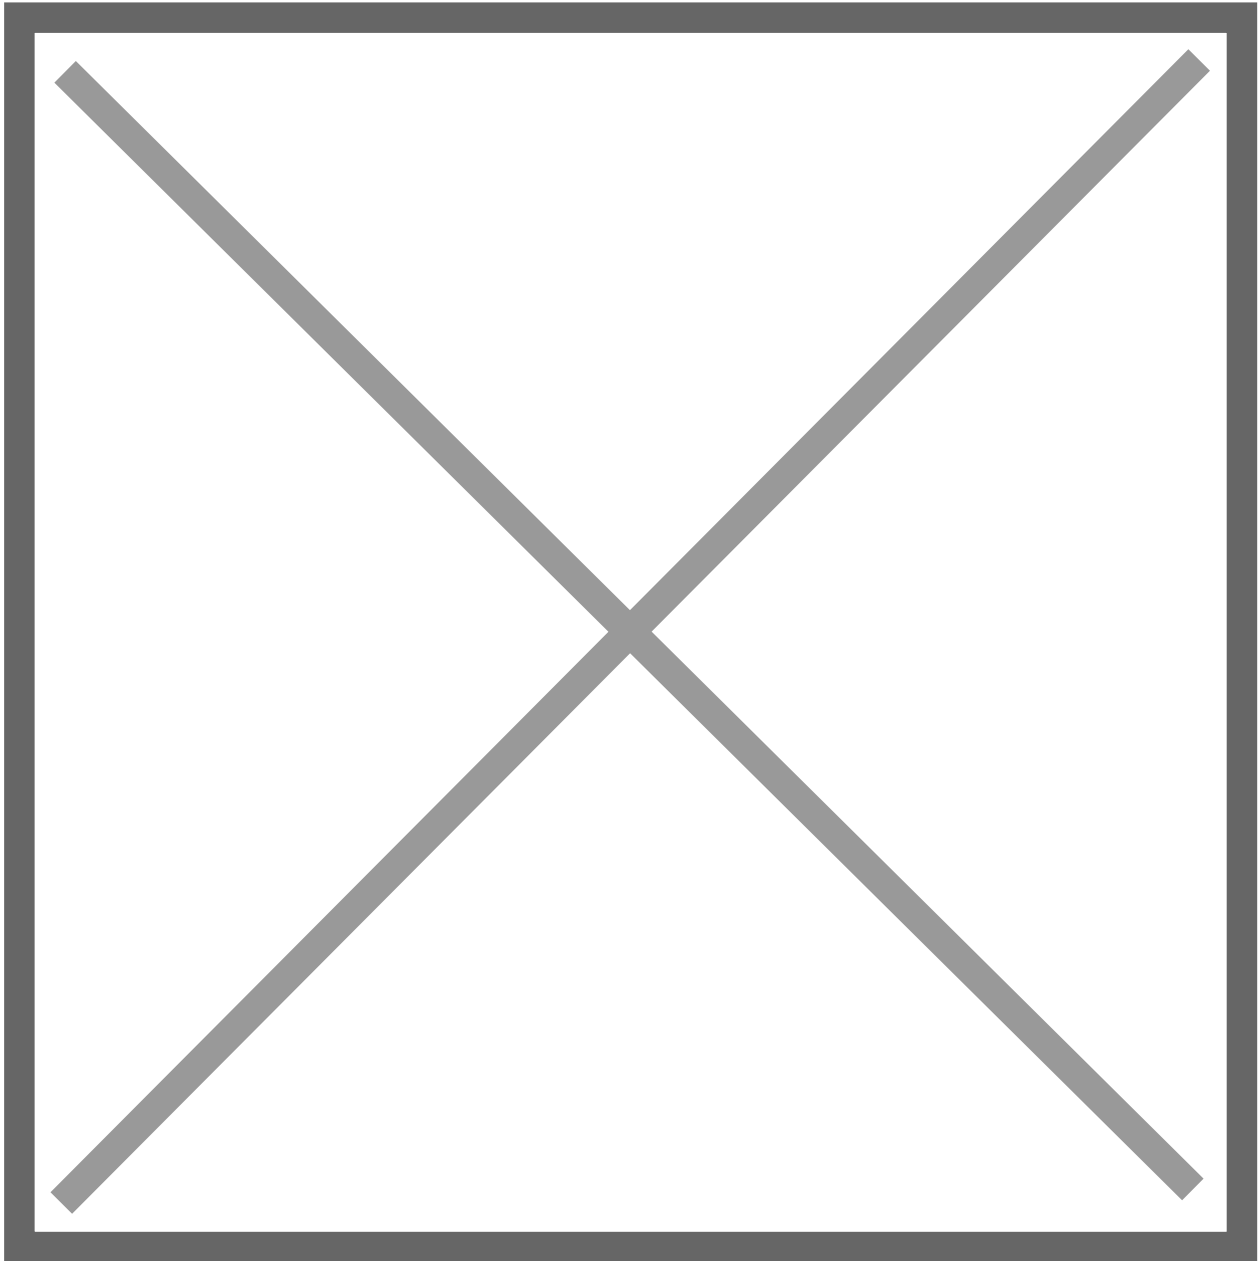

Status - an option to search using a status criteria of all or cancelled or received.

Date Sent From - search by selecting the date from and the date to that this transfer took place

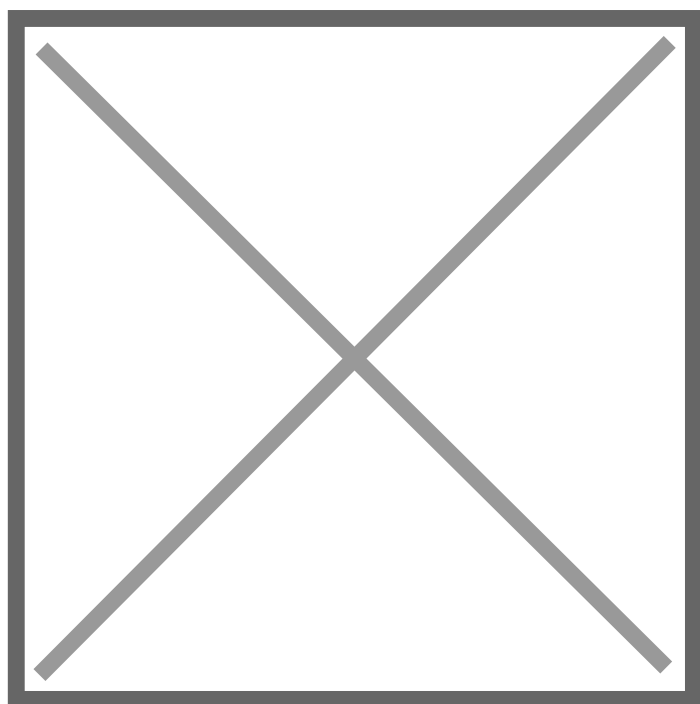

View button- View only the currently selected Warehouse Transaction Item

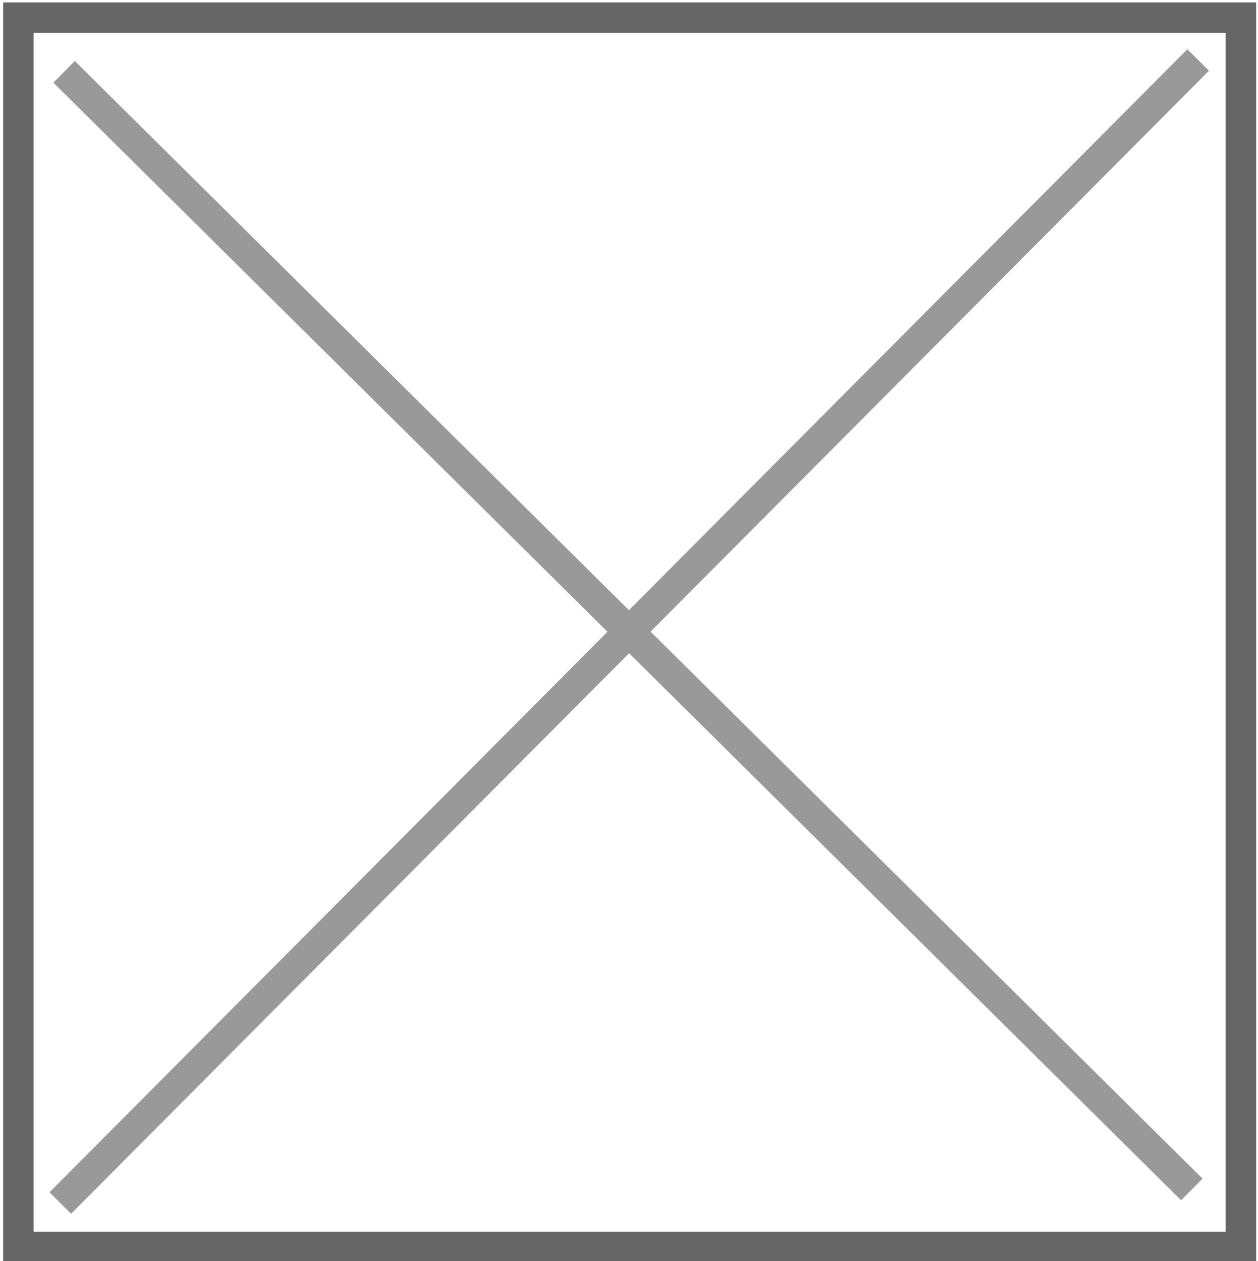

other available option in this field is to export to excel , add attachment , memo note and print.

Print button - The print button will print the currently selected Warehouse Transaction Item.

We also have a Consignment Print Option
