

Quick Time Log

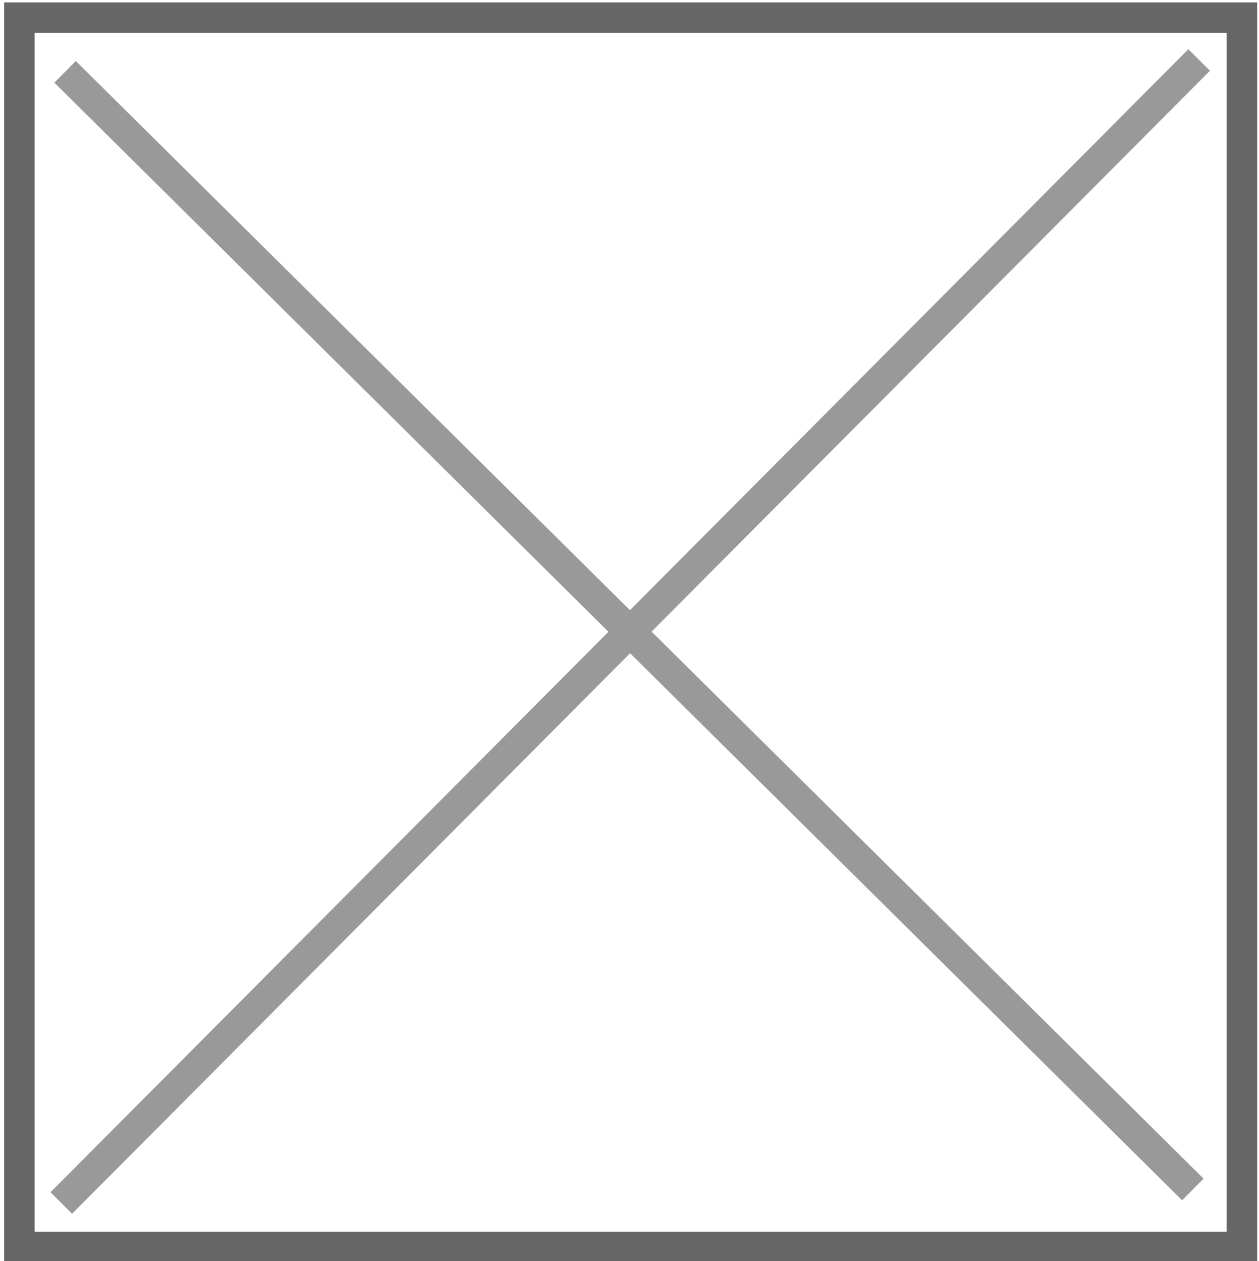

Capture time without all the additional menus

Only the very basics are here.

Add in a new quick time with the Plus + button

Employee	this will default to the user that is logged onto system
Client	add in the client that the log is against
Job	link to a job
Task	select the task
Employee rate	select the rate
Support log	link the time log to the support log
Reference	add a reference note, defaulted to the task description
Service item	service item linked to the task
Non billable	select if billable or not
Notes	add in notes for the time log
