

30. Job Reserved Inventory Items

Job Costing>Reports>Reports List

This shows what items are sitting in the WIP account.
It means that items have been reserved against a job but not yet invoiced.
This is also different from what is actually been used on the job
In the example we have here, we have actually used 2 items on this job.
2 items moved into WIP but then 1 got invoiced. When it was invoiced it was taken out of the WIP account and out of the system.
Report displays all inventory items reserved against Jobs
