

# Webatar Activate

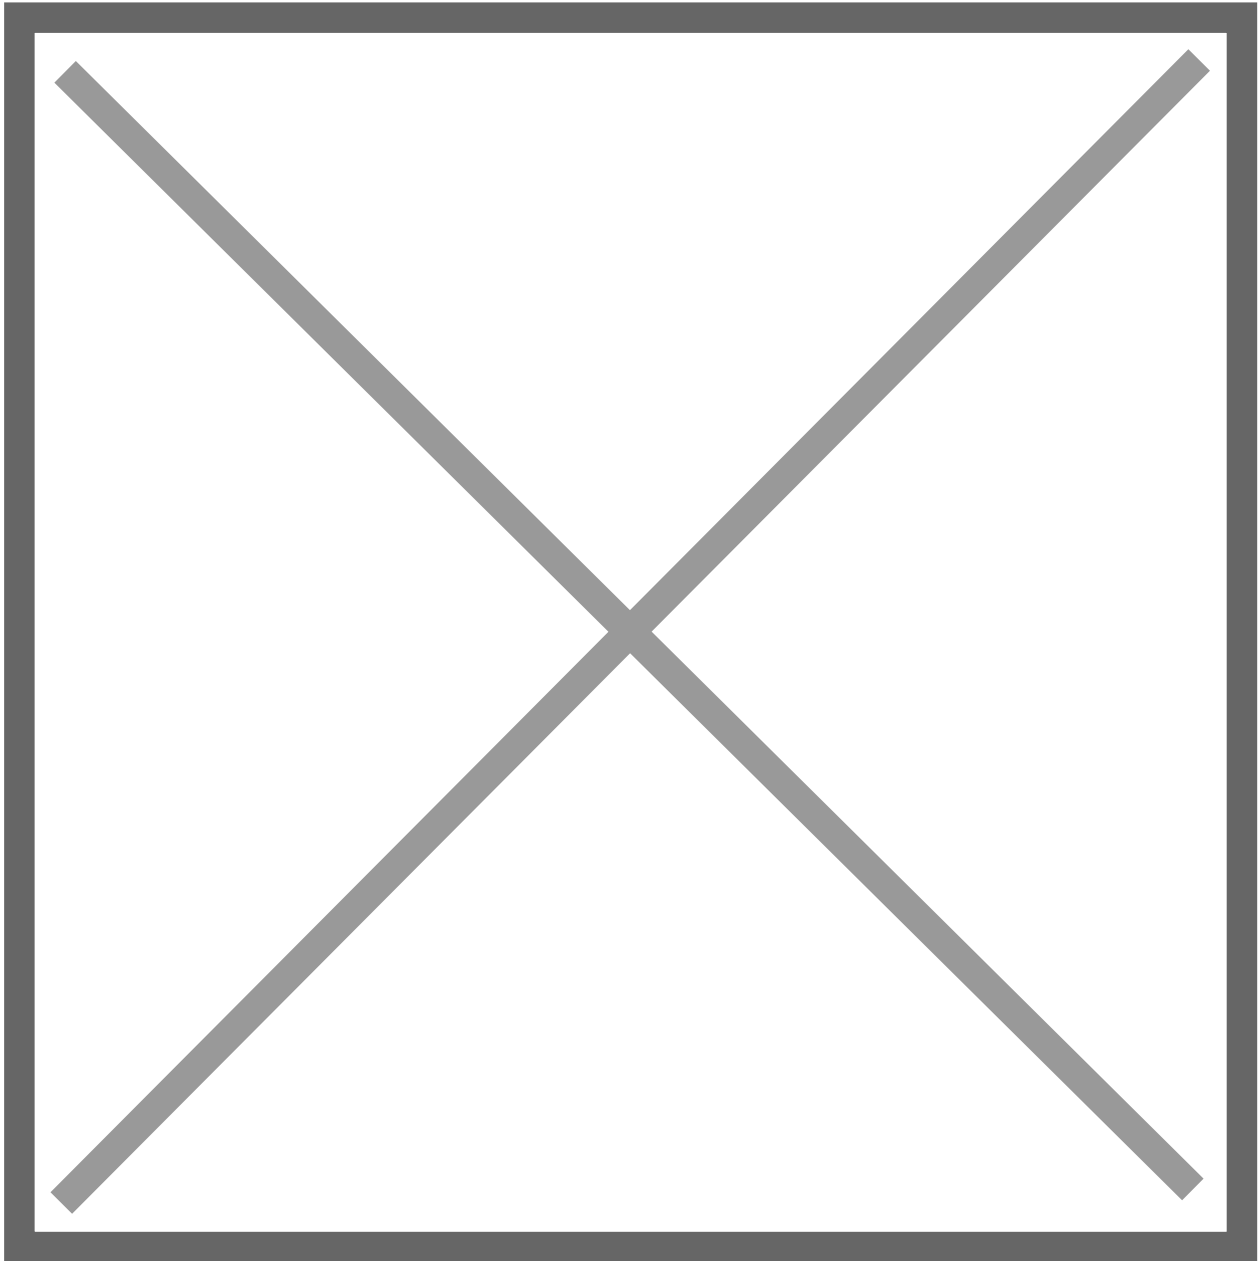

To allow Webatar business application to work, the user has to be activated on the main system

This setting is controlled in Huge ERP security in the user setup menu.

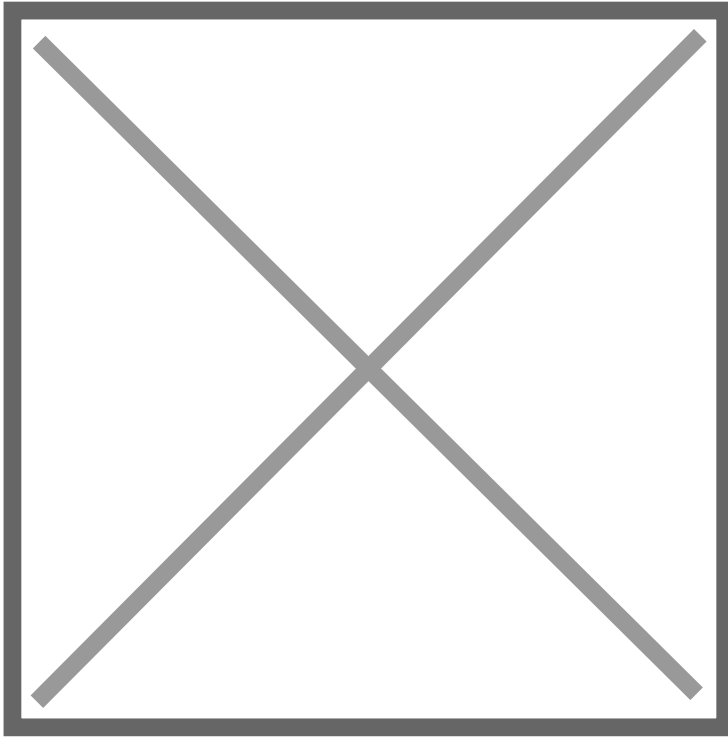

**System Configuration Module > General > User Setup > Edit User > Module Access tab**

Put the tick on for Mobile access - this will check if you have enough licenses

Mobile role - set the role for the user

Setup the warehouse access and the preferred users

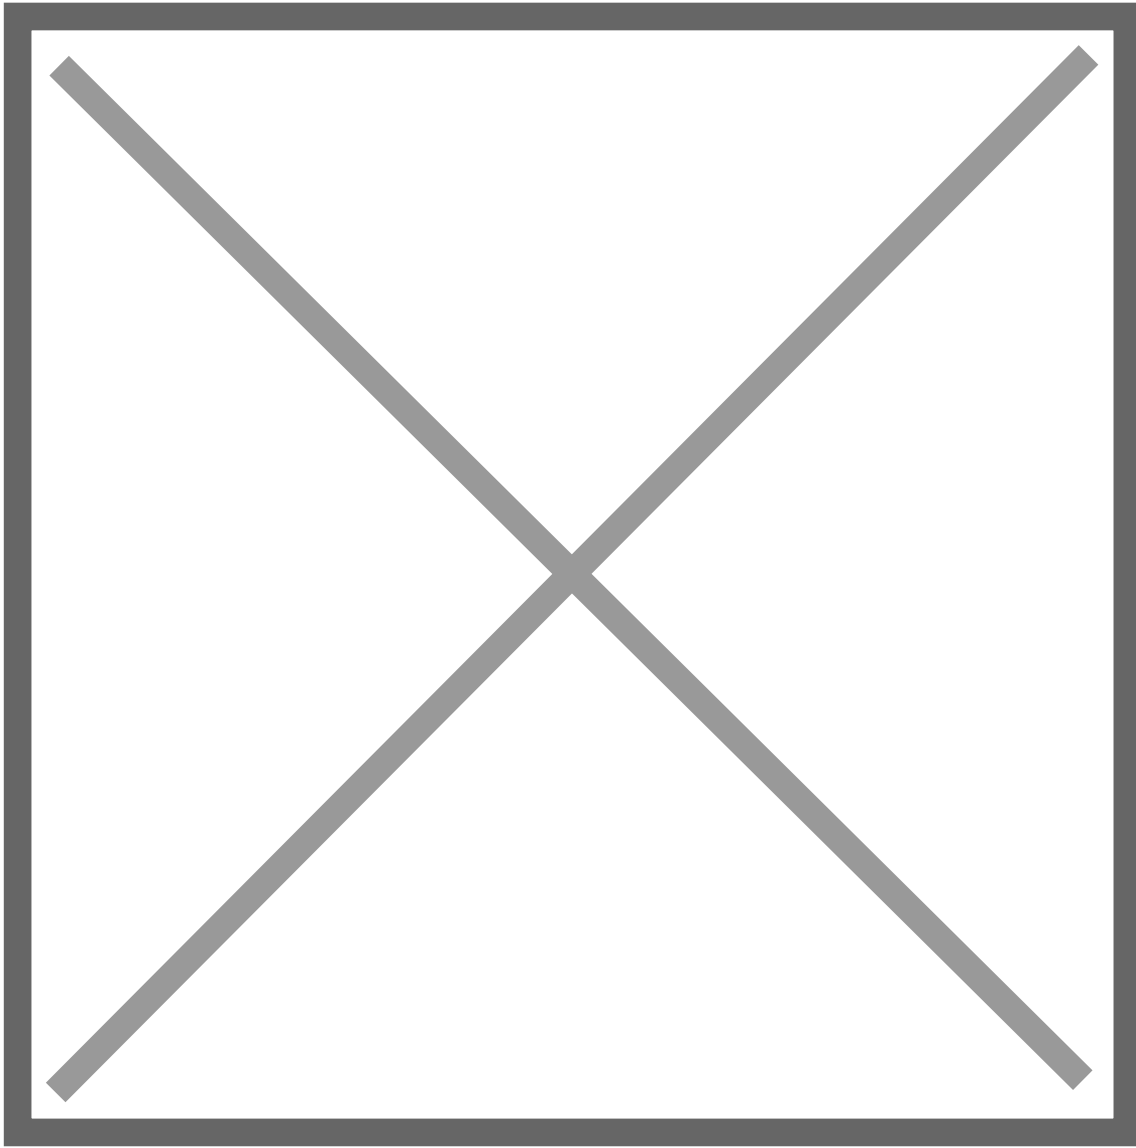

---

## Warehouse access

Set the warehouse access for the user

View only selected warehouse tick box if you only want to view selected warehouses.

Unticked allows user to see all warehouses

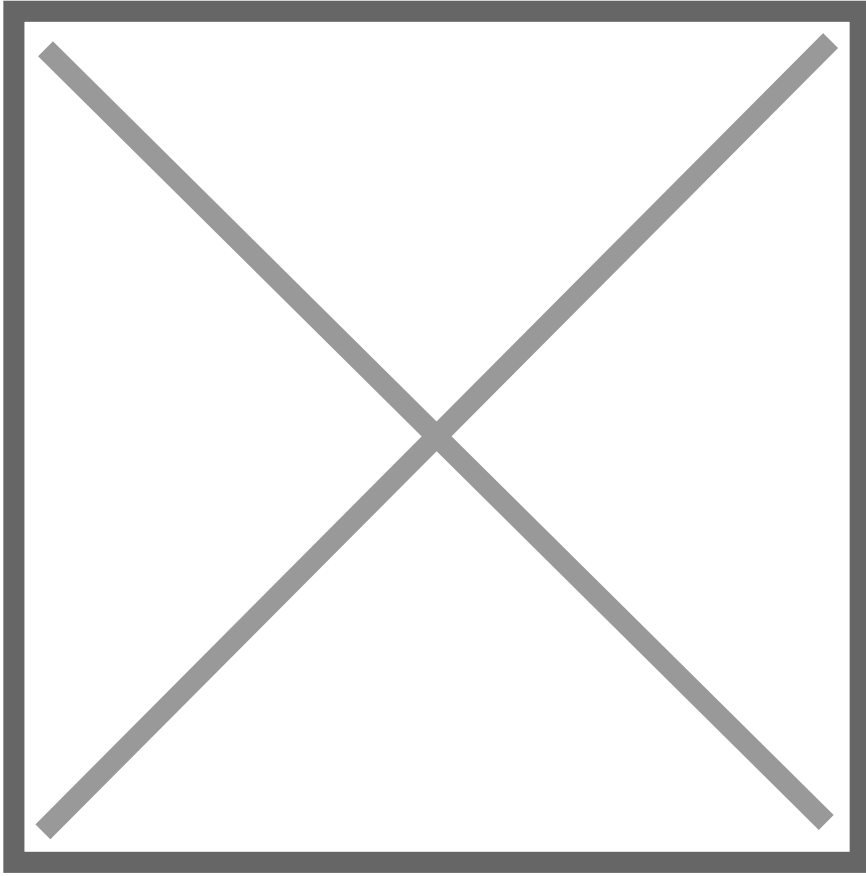

---

## Preferred users

Set the default user

This is used to send notifications to the user that a quote is ordered

---
