

AI Document Processing

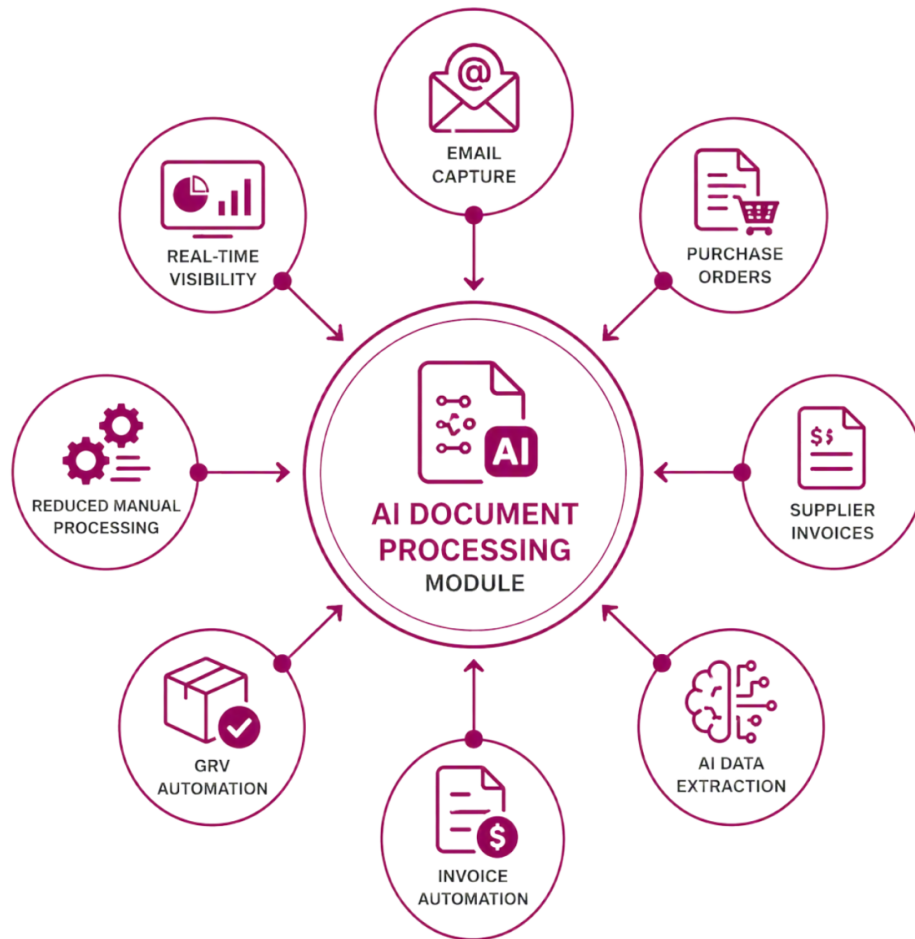

Automate the capture and processing of customer purchase orders and supplier invoices received through a designated email inbox. AI intelligently extracts key information and automatically converts customer purchase orders into invoices and supplier invoices into Goods Received Vouchers (GRVs), reducing manual data entry, improving accuracy, and significantly increasing processing efficiency.

Key Benefits

- **Automated Email Capture** – Monitor and process documents received via a designated email inbox.
- **AI Data Extraction** – Automatically identify and extract key information from purchase orders and supplier invoices.
- **Invoice Automation** – Convert customer purchase orders into invoices with minimal user intervention.
- **GRV Automation** – Convert supplier invoices directly into Goods Received Vouchers (GRVs).
- **Reduced Manual Processing** – Eliminate repetitive data entry and improve operational

efficiency.

- **Improved Accuracy** – Reduce errors through AI-driven document recognition and validation.
- **Faster Processing Times** – Process high volumes of documents quickly and consistently.
- **Real-Time Visibility** – Track document status and processing progress from a central dashboard.
