

Third-Party API Integration

Integrate Huge ERP with external business applications such as **Xero, Shopify, Go Sweet Spot**, and other third-party platforms. Automate the exchange of information between systems, reduce manual processing, eliminate duplicate data entry, and ensure critical business data remains synchronised across your technology ecosystem.

Key Benefits

- **Seamless System Integration** – Connect Huge ERP with accounting, e-commerce, freight, CRM, and other business applications.
- **Automated Data Synchronisation** – Keep information consistent across multiple systems in real time.
- **Reduced Manual Processing** – Eliminate duplicate data entry and minimise administrative effort.
- **Improved Data Accuracy** – Reduce errors by automatically transferring information between platforms.
- **Enhanced Operational Efficiency** – Streamline business processes through automated

workflows.

- **Real-Time Information Sharing** – Ensure departments & systems have access to current & accurate data.
- **Scalable Integration Framework** – Support existing and future business applications as your organisation grows.
- **Better Business Visibility** – Create a connected technology environment that improves reporting and decision-making.
