In order to see pricing, set up the security in Webatar for customer pricing and supplier cost prices

[Original Content - Click Here](#)

Webatar App Stock Receive and GRV

Create a Stock Count and Receive Stock

There are two methods for Receiving stock, link to each video manual 202311 below

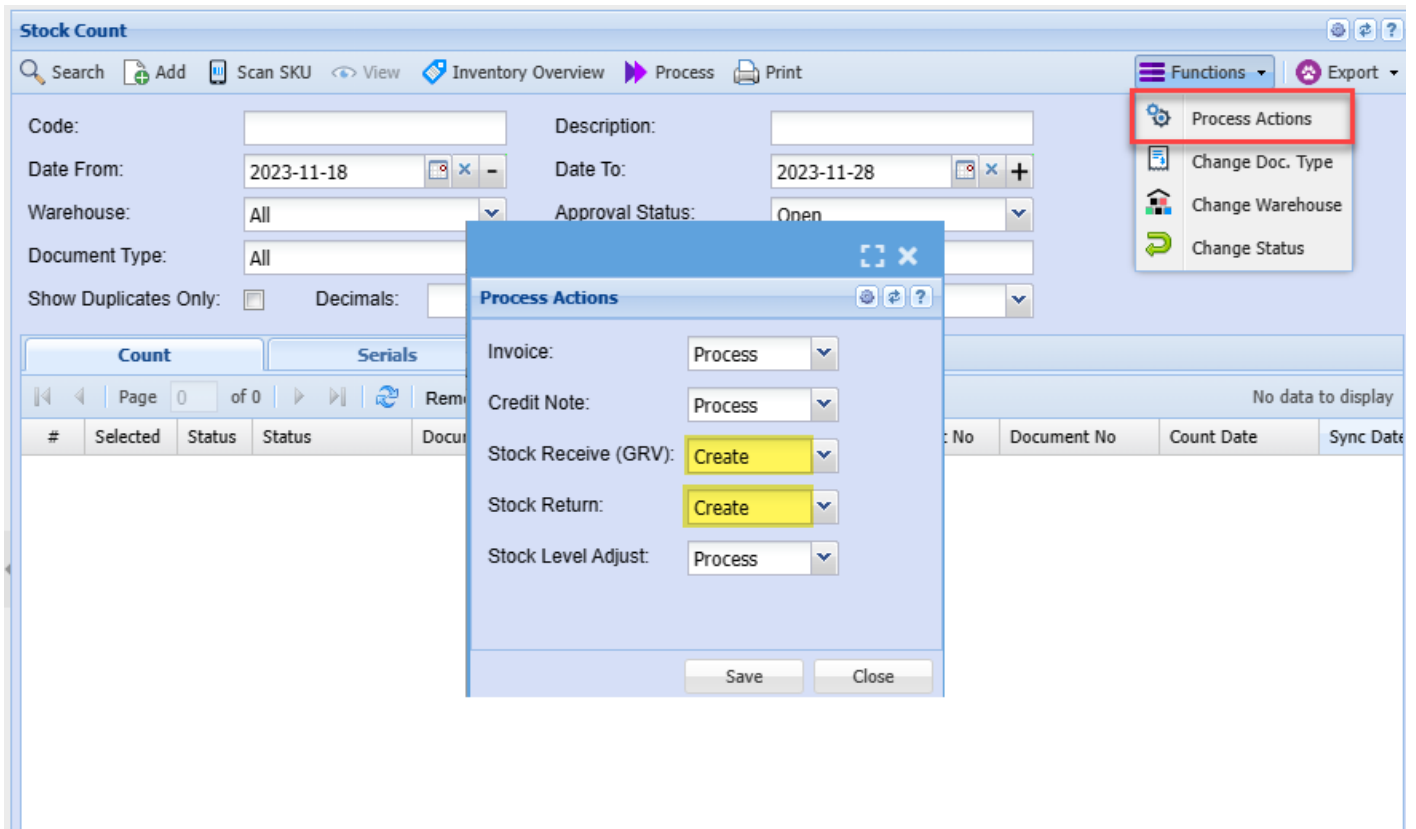

1. Receive stock (Quantity only) - [Stock_Count_Receive_Stock.mp4](#)
2. Receive stock and update prices (Quantity and price) - [Stock_Count_GRV_Price.mp4](#)

The methods above require a system change in order to run processes.

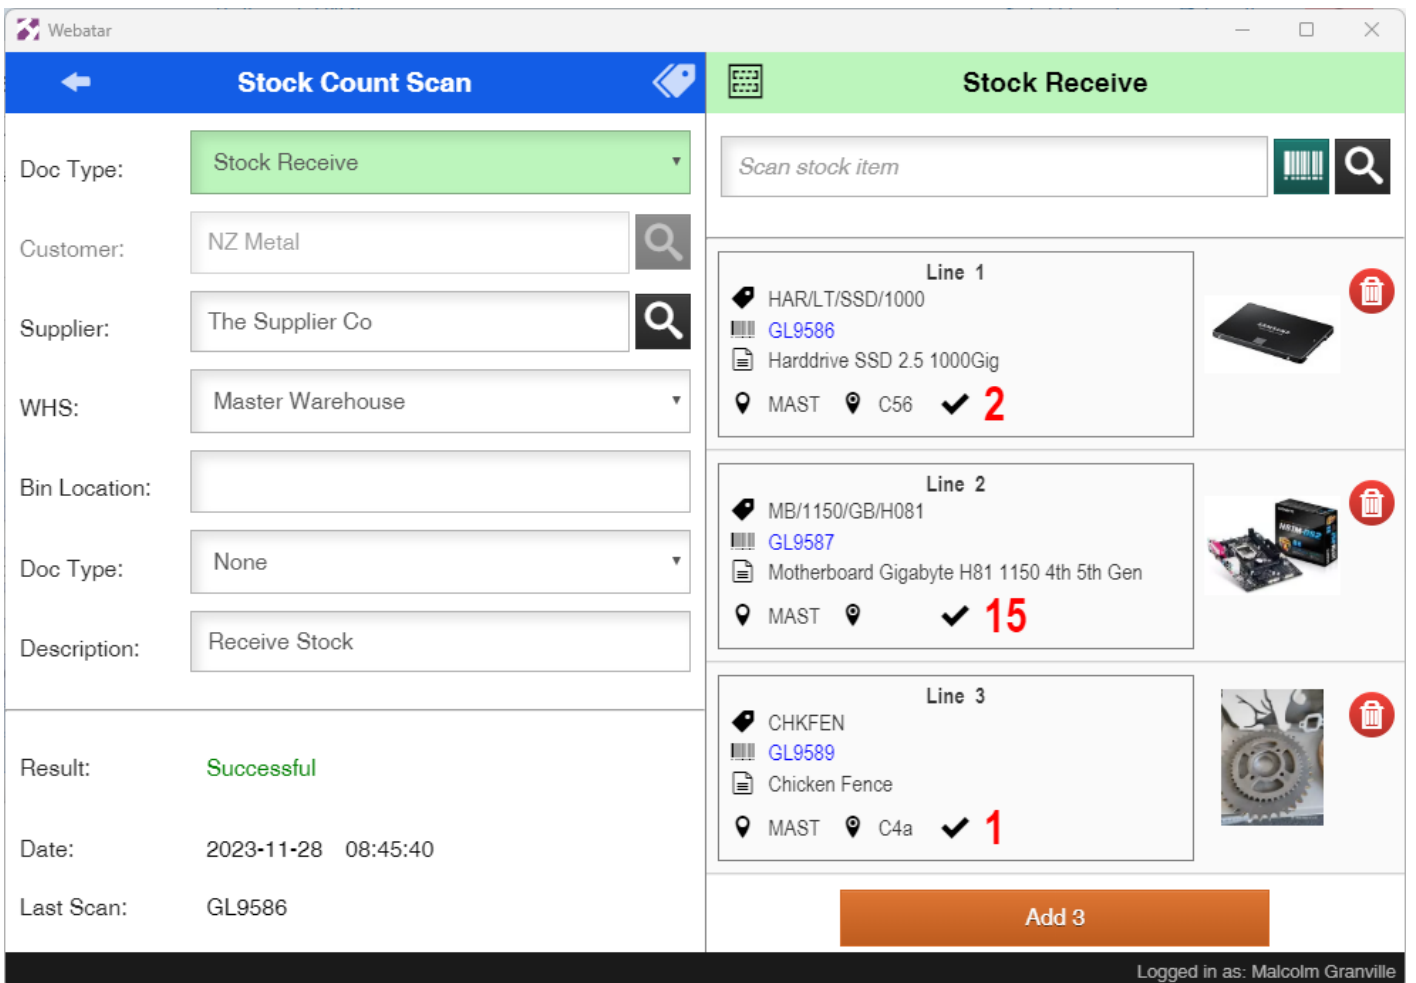

Receive stock and update prices require two steps

Process actions

None	Logs stock count only
Create	Logs stock count and creates document
Process	Logs stock count and creates document and processes document

Webatar App Stock Receive

When activating the stock take in main system, it is recommended to tick the zero actual Qty.

Zero actual quantity sets all stock to zero quantity forcing one to count all stock

On the Webatar app, sync to server to retrieve the stock take active number

Setting a document number for stock take allows the count to update the stock take directly after sync.

stock take counts will always increment quantities on the stock take.
